Address:

1904 West Jackson St., Lake County, Painesville

Price:

2.00 \$

What, I have , are in my opinion, one of the most comfortable catheters for men. They are individually , in pocket size, little bags.

These are 14 FR. the actual catheter tube, is incased in a sealed plastic type wrapper, which does not allow any contact with the actual catheter, which prevents any infections caused by contact with your hands, or other objects. The , end of the catheter, is extremely soft and pliable, which prevents any harmful contact with sensitive areas. They are extremely comfortable when inserting them . When finished, drain fluid, and close back up with the threaded end.
